

Parámetros Técnicos

Power supply: AC220V±10%V 50HZ

Power consumption: static power consumption < 50W, dynamic power consumption < 100W

Rotation direction: one-way or two-way

Communication interface: switch value, optional RS232/RS485

Pass direction: one-way or two-way

Product components: 1 set of standard case, 1 set of 90-degree revolving door, 1 set of panel barriers, 1 set of arc barriers, 1 set of control panels, 1 set of movement

Shape: length 1500 * width 1500 * height 2200, net height 2000mm

The fence length L: 600mm, and the door leaf is made up of 120 degrees of the fence

Swing arm length outside the chassis: ≤430mm

Opening time: not adjustable

Number of passers: 20 persons/minute

Working environment temperature: -21°C - 70°C, relative humidity ≤90%, non condensing

Automatic reset function: after opening the gate, the system will be automatically locked if it is not passed within the specified time, and the travel limit time is adjustable

Chassis material: standard 304 stainless steel. Thickness: 1.5mm
